- Feature Walls
- Fireplaces
- Kitchen Islands
- Backsplashes
- Accent Walls

**Dry-Stack :  
Charcoal**

**Great Lakes :  
Brindle**

# Great Lakes

“Great Lakes” is our best-selling Fusion Stone system for a reason. It fuses together ease of installation, no mortar convenience, a rugged, traditional visual effect, and a colour selection you will love. Nothing beats Great Lakes for elegance and utter good looks.

Choose from the distinctive rusty and brown multi-hues of Brindle, the relaxed, subdued tones of beautiful Raven, the contemporary, rich and cloudy overtones of Carbon, or the more subtle resonance of dusky Fawn.

# Dry - Stack

“Dry - Stack” Fusion Stone derives its name from the innovative feature of no mortar installation that translates into the much valued benefit of an easy, no mess application.

Dry - Stack produces an amazingly uniform and highly finished appearance to be admired for a lifetime. The self-defining Caramel and Charcoal colour selections are difficult to choose between but both offer stunning nuances of discriminating good taste.

# Phoenix

The classic style “Phoenix” Fusion Stone system incorporates mortar. This traditional bonding agent makes a significant contribution to an elegantly handsome and professionally finished appearance you’ll be proud of.

The only challenge for you will be choosing between Cambria and Silverado, the two gorgeous Phoenix colours. That, and convincing your astonished friends it is a veneer.

Do it yourself  
masonry you  
can actually  
do yourself.

Fusion Stone is an easy and budget-friendly way to beautifully upgrade your home, inside and out. Available in three distinct textures, all backed by a Lifetime Guarantee, Fusion Stone can be installed on both new and existing wall assemblies regardless of surface. With just a few basic tools your average home handyman is transformed into a Fusion Stone expert!

## WHAT YOU NEED

- tape measure
- level
- rubber head hammer
- power drill and bit (bit is provided)
- grinder or saw with masonry blade
- safety glasses
- breathable weather resistant barrier
- plywood or OSB

# YOU CAN DO IT!

## PATENTED DIY CLIP SYSTEM

Fusion Stone features a patented system of **stainless steel clips and screws** that can be installed in any weather by anyone for a lifetime of maintenance free performance.

# Step One

## Prepare Your Surface

Fusion Stone is installed over a Plywood or OSB substrate. Ensure that the substrate has been covered in a code approved, breathable, weather resistant barrier. Not required on interior installations.

# Step Two

## Installing The Starter Strip

Starter Strips are used at the base of all jobs as well as above any openings (windows and doors). Level and install the Starter Strips using the stainless steel screws provided.

## Step Three

### Installing Fusion Corners

Begin installing Fusion Stone at the corner. As you build the corner ensure that you alternate short and long sides.

## Step Four

### Complete Installing Stone

Continue to lay the stone in the pattern described in the detailed instructions. The last stone installed on every row may need to be cut to length.
